 sudhanshusharma517@gmail.com |  +91 8920725790 | New Delhi, India

EDUCATION

B.Tech in Computer Science and Engineering

Maharaja Surajmal Institute of Technology

Current CGPA: 9.3/10 | Class XII - 95% | Class X - 95%

New Delhi, India

Sept 2023 - Aug 2027

EXPERIENCE

Backend Intern | Yahweh Software Solutions

Jul 2025 – Oct 2025

- Developed RESTful backend services and feature modules using Node.js and Express.js
- Implemented JWT-based authentication and CRUD workflows with MongoDB
- Validated REST APIs through Postman and collaborated using Git-based workflows

Frontend Intern | Airtech India

Jun 2025 – Jul 2025

- Built a responsive React.js application with reusable UI components, improving navigation, consistency, and maintainability
- Translated business requirements into scalable frontend features through stakeholder collaboration

Technical Head | Prakriti, MSIT

Aug 2025 – Present

- Led technical execution for Prakriti's annual event website, coordinating junior developers from requirements through deployment
- Mentored junior developers on GitHub workflows, code reviews, and web development practices
- Collaborated with the senior core team to evaluate UI and landing-page concepts and translate selected designs into technical implementations

Open Source Contributor | SSOC 2025

Jun 2025 – Aug 2025

- Developed feature enhancements and UI improvements through pull requests
- Collaborated with project maintainers using Git and code review workflows

PROJECTS

CareConnect (GitHub)

Node.js, Express.js, Socket.IO, React.js, MongoDB

- Architected a multi-tenant SaaS support-chat platform enabling businesses without in-house IT (e.g., clinics, service agencies) to deploy real-time customer communication
- Scoped platform requirements from a real client need surfaced through a digital marketing agency's client base
- Implemented Socket.IO room-per-session architecture, enabling a single worker to manage multiple simultaneous visitor conversations from one dashboard
- Designed ephemeral, no-login visitor sessions with automatic data cleanup on session end, removing persistent-identity overhead for time-sensitive use cases
- Built real-time image and video sharing across chats with a modular, tenant-isolated backend

InsightMiner AI (GitHub)

Next.js, Python, NLP, FastAPI, MongoDB

- Built a data analysis pipeline to process large-scale consumer review datasets
- Implemented NLP preprocessing and sentiment analysis to identify key trends and pain points
- Generated automated insights to support data-driven product improvement decisions

SKILLS

Languages : C++, JavaScript, SQL

Core CS : Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Backend : Node.js, Express.js, REST APIs, JWT Authentication

Frontend : React.js, HTML5, CSS3, Tailwind CSS

Databases : MySQL, PostgreSQL, MongoDB

Tools : Git, GitHub, Postman, Puppeteer

ACHIEVEMENTS & LEADERSHIP

- Solved **300+** **Data Structures & Algorithms** problems across coding platforms
- Selected for the Advanced Evaluation Round of the Flipkart Grid × Bengaluru Police Hackathon, **ranking among 1,604 teams from over 70,000 applicants**
- Qualified for multiple hackathon evaluation rounds, including **Top 25**, **Top 40**, and prototype stages
